Class 2

Building Product Information Sheet

About this form

This template has been developed to help manufacturers and importers into Aotearoa New Zealand provide the information required by the **Building (Building Product Information Requirements) Regulations 2022**.

How to use

- > Download and save this form in your computer.
- > Fill out the form with the relevant information about your product.
- > You may use this filled out form and publish it on your product web page.

Types of building products

There are two classes of designated building products with different information requirements for each. The below summarises the information that must be provided for each class of product and when the information must be made available.

Class 1: Batch or mass-produced products

Batch or mass-produced products that are typically available for retail or wholesale purchase. For example, cladding products, mechanical fixings, insulation products, internal lining, roofing products, structural wood-based products, structural steel and reinforcing products, sanitary plumbing, and drainage products, including tapware (note: this is not an exhaustive list).

Class 2: Custom-made lines of products

Custom-made lines of products that are made to order to client specifications. For example, external window joinery and doors that have been customised to the specifications of individual clients (for example, specifications on dimensions and glass type).

MBIE provides resources to support manufacturers, importers, wholesalers, distributors, and retailers to understand what their obliqations are, and how to meet them.

Background

The Building Amendment Act 2021 introduced new minimum information requirements for building products to support better informed decision-making by building consent authorities, building owners, builders, and designers. The new regulations designate several building products for which building product information must be provided and establish the minimum requirements for that information.

The new regulations will ensure better and more consistent information is available for these products, helping inform building consent authority decisions on building consent applications. This should result in fewer requests for information, and therefore faster processing times. In addition, the requirements will ensure people, including homeowners, are given the information they need to make good decisions about products, and use and maintain them as intended.

Please note that The Ministry of Business, Innovation and Employment (MBIE) is not responsible for the input details provided in the template.

Class 2

Building Product Information Sheet

Product name (include	trie Drand name).			
Pacific X-ray Barrier Window				
Product line (the produc	ct line from which the product is a	customised):		
Pacific Doors Hospital Doors				
Product description ar	nd its intended use (measuren	nents, materials, usage):		
The Pacific X-ray Barrier window is a steel framed window fitted with radiation shielding lead glass as required for secondary barriers in diagnostic x-ray rooms. The glazing is available in lead equivalency of 1 - 3.0 mm. The window is available in a range of lead-lined steel frames.				
The Pacific X-ray Barrie	er windows are not available w	ith a fire rating.		
This product is intende	ed for interior use only.			
Product identifier (if ap	oplicable):			
(This could be a Global Tra	 ade Item Number (GTIN) or auick r	esponse code (QR code), or any other distinguishable part/model number or identifier.)		
Place of manufacture:				
	Aotearoa New Zealand	Overseas		
	ne of the manufacturer(s):			
Pacific Door Systems Lt	td			
Address for service:		Consider.
