

Class 2

Building Product Information Sheet

About this form

This template has been developed to help manufacturers and importers into Aotearoa New Zealand provide the information required by the **Building (Building Product Information Requirements) Regulations 2022**.

How to use

- › Download and save this form in your computer.
- › Fill out the form with the relevant information about your product.
- › You may use this filled out form and publish it on your product web page.

Types of building products

There are two classes of designated building products with different information requirements for each. The below summarises the information that must be provided for each class of product and when the information must be made available.

Class 1: Batch or mass-produced products

Batch or mass-produced products that are typically available for retail or wholesale purchase. For example, cladding products, mechanical fixings, insulation products, internal lining, roofing products, structural wood-based products, structural steel and reinforcing products, sanitary plumbing, and drainage products, including tapware (note: this is not an exhaustive list).

Class 2: Custom-made lines of products

Custom-made lines of products that are made to order to client specifications. For example, external window joinery and doors that have been customised to the specifications of individual clients (for example, specifications on dimensions and glass type).

MBIE provides resources to support manufacturers, importers, wholesalers, distributors, and retailers to understand what their obligations are, and how to meet them.

For more information, visit [Building product information requirements | Building Performance](#)

Background

The Building Amendment Act 2021 introduced new minimum information requirements for building products to support better informed decision-making by building consent authorities, building owners, builders, and designers. The new regulations designate several building products for which building product information must be provided and establish the minimum requirements for that information.

The new regulations will ensure better and more consistent information is available for these products, helping inform building consent authority decisions on building consent applications. This should result in fewer requests for information, and therefore faster processing times. In addition, the requirements will ensure people, including homeowners, are given the information they need to make good decisions about products, and use and maintain them as intended.

Please note that The Ministry of Business, Innovation and Employment (MBIE) is not responsible for the input details provided in the template.

Class 2

Building Product Information Sheet

Product name (include the brand name):

Pacific Doors PPSD

Product line (the product line from which the product is customised):

Security doors

Product description and its intended use (measurements, materials, usage):

The Pacific Presto Security Door is a steel door with a reinforced box section steel frame incorporating a range of infill panels including steel, glazing and voice transfer panels. It is hung on steel block hinges. This type of door set is ideal where large clear viewing is required.

Leaf Sizes: The PPSD is available for manufacture to any practical size to suit client requirements, in either a single or paired door configuration.

Leaf Thickness: 50mm thick

Weight: 75-100 kg/m² depending on the hardware and infill panels.

Glazing: Security glazing up to 22mm thick is suitable for use in the PPSD door set.

Finish: Standard preparation for interior use is powder coated. Standard preparation for exterior use is sandblasting followed by zinc arc spray to the frame then either priming or powder coating. Other finishes, or a paint quality door set are available upon request

Exterior: The PPSD is tested to AS/NZ 4284:2008 - "Testing of building facades" and complies with the requirements of NZS 4211:2008 - "Specification for performance of windows" up to and including the high wind zone.

Product identifier (if applicable):

(This could be a Global Trade Item Number (GTIN) or quick response code (QR code), or any other distinguishable part/model number or identifier.)

Place of manufacture: Aotearoa New Zealand Overseas

Legal and trading name of the manufacturer(s):

Pacific Door Systems Ltd

Address for service:

STREET NAME 17 Meachen St. SUBURB Seaview

CITY, COUNTRY Lower Hutt, New Zealand POSTCODE 5045

Relevant Building Code clauses:

B2 Durability: Performance clause B2.3.1(b)
 D1 Access Routes: Performance clause D1.3.1 (b)

Statement on how the building product is expected to contribute to compliance:

B2.3.1(b): The PPSD can be finished to provide a durability of at least 15 years in all interior applications, excepting applications where the product is subjected to direct exposure to moisture. Durability is dependent on product being installed and maintained in accordance with Pacific Door Systems Ltd requirements.

D1.3.1(b): PPSD doors can be used within an access route where relevant considerations are specified in the project requirements.

Relevant standards:

AS3555.1-2003 "Building Elements - Testing and Rating for Intruder Resistance"

AS/NZS 4284:1995 "Testing of building facades"

- *options for compliance set out in section 19 of the Act (regulations, acceptable solution, verification method)*
- *standard or technical document that describes the performance of the building product or the relevant specifications to which the building product was manufactured*
- *physical properties of the building product*
- *how the building product is intended to be used.*

Limitations on the use of the building product:

The PPSD is tested to AS/NZ4284 for water ingress in exterior applications. E2 compliance is dependent on suitable flashing system design by others.

If this product is installed in an exterior wall it should be given the maximum possible amount of protection, including overhead protection. Flashing design, supply, and installation by others.

Limitations on size and other product options are as per product datasheet.

Design requirements that would support the use of the building product:

The PPSD is designed for use in commercial buildings where a fully glazed medium security door is required.

Full specifications are listed in the product datasheet: <https://www.pacificdoors.co.nz/security/security-doors/ppsd>

Installation requirements *(also provide link to the product installation guide)*:

Please contact Pacific Doors for information.

Maintenance requirements *(also provide link to the product maintenance guide)*:

As per Pacific Door Systems Ltd Operations and Maintenance manual:

<https://www.pacificdoors.co.nz/sites/default/files/images/Glazed%20Screens%20%20Handling%20and%20care%20manual%20%28End%20User%29.pdf>

Is the building product/building product line subject to warning or ban under section 26?:

Yes No

If yes, description of the warning or ban under section 26:
